IMS (UK) Ltd

THE COMPANY & SERVICES

The company offers the latest in manufacturing capabilities, all within a modern manufacturing plant

Integrated Manufacturing Systems (UK) Limited are a manufacturing company specialising in the production of bespoke products from a wide range of materials. Utilising the latest technology in all aspects of the company from client management to manufacture, we are able to offer a complete solution from conception / design to completion and installation.

Our experienced staff enable us to offer a wide range of services allowing us to not only manufacture your product, but also project manage it throughout its various stages.

Project Management

Viewed as a 'beginning to end' service, taking the load off the client and supporting the project throughout we provide:-

- Customer Liaison
- Site Surveying
- Liaison with Designers, Contractors & other trades
- Work within statutory regulations
- Production of CDM & H&S documentation
- Liaison with all other associated trades
- Production of all relevant drawings
- Detailed Programmes of Works

Design

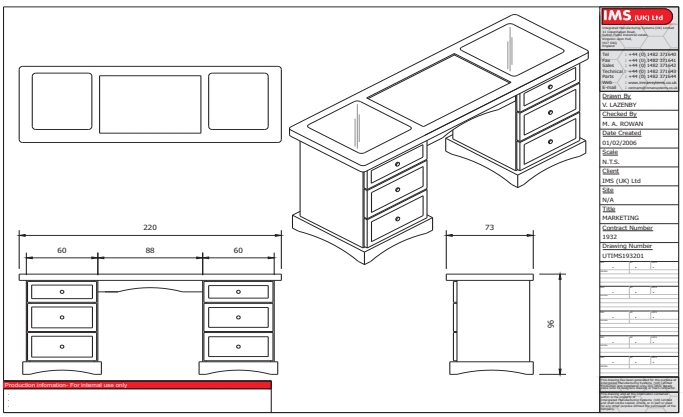
IMS offers a bespoke design service to bring your ideas and concepts to reality. Whilst familiar with traditional methods and materials, we are always forward thinking, using every opportunity to bring together the latest in materials and manufacturing techniques to develop new and exciting products for you.

Computer Aided Design

CAD is a substantial element throughout the design and implementation of your product.

Using the latest 3D technology we are able to produce illustrations prior to manufacture allowing you to view your finished product before undergoing prototyping and its associated costs.

Some aspects of the project may not require 3D and as such we also offer a 2D service, providing detailed working drawings for survey, manufacture and installation purposes.



Prototyping

To ensure complete customer satisfaction we offer a prototyping service enabling you to monitor the development of your product, understand its design and construction.

We realise the importance of seeing, touching and working with a full size sample of your equipment, this will help you attain the perfect combination of its aesthetic and operational elements.

This process is invaluable in terms of ensuring that all elements of the product meet the agreed specification and its functional suitability.

Production

With the significant change in manufacturing techniques over the last few years, we have taken on board the latest equipment and adopted the benefits associated with these, to ensure we can meet the ever changing demands of our client base.

With a production facility of 22,000 sq. ft. we are able to manufacture your product in a professional environment ensuring a quick turnaround and providing you with a quality product at a competitive price.

Installation & Commissioning

Our team of experienced installation engineers and site crews are able to offer a complete solution from removal works to full installation, commissioning and ongoing product support and service.

In Conclusion

With a team of dedicated staff that combine years of experience within the industry, our company understands fully what you need as the client.

We are totally committed to providing a range of services ensuring we set refreshing new standards in manufacturing and installation.

Our ability to combine these services within a professional and friendly environment enables us to focus, build and protect our client relationships.
